

100 Gigabit Fiber Optic Patch Cord

Overview

100G OS2 Single-Mode Fiber Cables are the highest performing fiber optic cables currently available, with further distances than multimode specifications. OS2 fiber can transport data at 100G for up to 10km using a 1310nm transceiver, or up to 40km using a 1550nm transceiver. Both these types of transceivers are now widely used across short to mid-range data.
