Direct Fusion Optical Cross-Connect Box

Overview

The optical cross-connection Cabinet short for OCC, or some other place call it Optical Distribution Cabinet (ODC) or Fiber Distribution Terminal (FDT), is a device designed for indoor/outdoor cable management. generally the OCC/ODC/FDT consists of several part, like integrated. The Lightera LGX® Combination Shelves are the original optiacl fiber frame solution. Customize your installation with this fast installation design. Adopt stainless steel frame, double-layer structure, is provided with heat insulation layer. Dust-free, waterproof. A cross connect cabinet, also known as an optical cross cabinet or OCC is a device used for connecting, distributing, and dispatching trunk optical cables and distribution optical cables in communication networks for communication systems, power systems, traffic control systems and cable TV. SEESUO 144-218 cores cabinets are suitable for optical transmission network and the optical access network, to realize the connection and dispatch of the trunk optical cable and distribution optical fiber. The cabinet is with excellent performance, safe and reliable, flexible scheduling, and is.
