Integrated Intelligent Security Power Supply

Overview

The PPC-IPS-150 provides instant power backup during outages and protects equipment from voltage fluctuations through advanced regulation and filtering. Its integrated lithium battery ensures reliable long-term operation, preventing costly downtimes and data loss. The power supply provides the Protege system with 12VDC power, ideal for running security, access control or automation devices along with large numbers of Protege network powered modules in the same installation. The power supply includes intelligent charging for optimum performance and allows for. Taipei, Taiwan, August 19th, 2024 - Advantech is excited to introduce the PPC-IPS-150, a cutting-edge smart power device designed to provide unparalleled protection for industrial systems and devices against power failures and unpredictable situations. The most attractive feature of DRS-240/480 is the multi-functional integration, which includes AC-DC power supply, battery charger, DC-UPS and communication monitor in a single compact package. The product line is now quite complete and has gained significant market share. As a response to the rapid development of complex building architectures, governments of Europe, USA and China. Microchip offers a comprehensive set of Intelligent Power Supply solutions enabling you to meet these challenges.
