Modular Intelligent High Voltage Distribution Box

Overview

The modularized intelligent high-voltage distribution box has the following beneficial effects that inner relays are controlled in a self-operated manner, and outer error operation is avoided; the state of each device can be monitored; a screw loosening problem can be monitored and. The modularized intelligent high-voltage distribution box has the following beneficial effects that inner relays are controlled in a self-operated manner, and outer error operation is avoided; the state of each device can be monitored; a screw loosening problem can be monitored and. The high voltage solutions for power distribution developed and produced by Würth Elektronik ICS ideally complement the established portfolio of central electrical units and Power Boxes for 12/24 V vehicle electrical systems. The focus here is on solutions for manufacturers of mobile machinery. HIGH VOLTAGE / HIGH CURRENT / HIGH POWER. On the conventional, mostly diesel-driven side, the rise of sub-systems such as supercaps, electric power steering or e-compressors. The invention discloses a modularized intelligent high-voltage distribution box which comprises a box body. High-voltage modules comprising 300A modules, 150A modules, 50A modules, 20A modules and pre-charging modules are arranged in the box body. A master control module used for low-voltage. HUBER+SUHNER's modular High Voltage Distribution Unit (mHVDU 800) can be tailored to customer specifications with a short lead time, helping OEMs bring new electric vehicles to market faster while maintaining high quality. The mHVDU 800 is tested and validated against global automotive regulations. Supercharge Your Innovation With Domain-Expert AI Agents! What is AI technical title?
