

12 Spectrum Splitter Round Port

Overview

The STHC12G is a 12 port RF combiner/splitter – ideal for any rack/commercial installation. It can be used to either combine or split RF signals and operates within a bandwidth of 40-1,000MHz and with impedance of 75Ω. Model 12N727 covers DAS, 4G/LTE, GPS/L-Band, WiMAX, GSM, W-CDMA, PCS/DCS/UMTS and many more global. INSTOCK twelve way power divider, power combiners are available with Type N, SMA, TNC, BNC, and QMA connector options. All models are optimized for broadband operation covering the frequency ranges from 350 to 1000 MHz, 698 to 2700 MHz, 1 to 2 GHz, and 2.4 to 6 GHz with unsurpassed electrical. This power splitter is particularly suitable to provide the reference signal, for example 10 MHz, coming from a source of precision like a GPS or a standard rubidium, etc., for the time base of all instruments in a laboratory. For this application it is necessary the divider have a good isolation. The SP10A12 is a wide band lumped elements 12 way SMA power divider-splitter that covers the frequency range of 5-500 Mhz. 8 dB and isolation provided between output ports. It features insertion loss of 19dB @40-450MHz and 21dB @450-1,000MHz; and input. Customers who bought this product also purchased.
