

3i Relay Protection

Overview

The Iripro V4 3I EI L Current Protection Relay from C&S Electric is a crucial component for safeguarding electrical systems. Designed to protect against overloads and short circuits, this device is essential for maintaining the integrity of industrial and commercial power. Restricted Earth Protection (64R) The restricted earth fault relay is high impedance differential scheme which balances zero sequence current flowing in the transformer neutral against zero sequence current flowing in the transformer phase windings. Any unbalance for in-zone fault will result in an. Please note before using selection table! What is the difference between "Sum 3I" and "Input Io" when setting the ANSI 50/51N protection in a Sepam relay?

| Schneider Electric UK Skip To Main Content United Kingdom United Kingdom Our Brands Help and Contact Centre My Documents Add to favorite Go to cart Cancel Products Low Voltage Products. The C&S IRI-PRO-V2-3I-EI is a numerical protection relay offering three-stage over-current and one-stage earth fault protection, featuring both definite and inverse time delays, independent settings for phase and earth fault stages, and a wide universal auxiliary power supply range of 24-260V AC/DC. PW41i is designed with 3 currents (3*40A) and 4 voltages (4*300V). This protection relay configuration consists of three distinct stages: Instantaneous Overcurrent Protection (Stage I), Time-Limited.
