

Add another router to the mobile fiber optic cable

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Adding a second router is a great way to expand your network capacity, as well as the reach of your wireless signal in weak or "blackout" areas. Connect the modem to the first router. I know I can. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). Basically, the way you have it set up is that the box to Room A is being used as an extension to get the ONT Ethernet hand off to your router in room A, but you have no second cable to bring it back here to pass the network to Room B. This closet should be your centralized location for your.
