# Barbados Tunable Optical Module SFP

## Overview

It is a high-performance SFP+ module for 10G Ethernet, 10G Fibre Channel, SONET OC192, and SDH STM-64 DWDM systems. Capable of being tuned by the network administrator, this tunable SFP+ help you simplify and minimize stock requirements. The module supports data rates from 9. 3 Gbps and is provided in an SFP+, MSA-compliant package. The optical transmitter utilizes the Lumentum. First of all, I must salute the both geniously clever and absolutely gorgeous packaging: frankly, my I. colleague and I had blinking stars in the eyes when opening the boxes. I had a previous experience with both proprietary and generic transceivers/DAC, and I must admit that your hardware is. Tunable SFPs are optical transceivers that allow you to change the wavelength of the transmitter. 3V, LC connector, -40/85°C operation, 15km FTLF6836P1BNL transceivers are Enhanced Small Form Factor Pluggable Tunable SFP28 transceivers designed for use in.
