

Cable tray fabrication cuts

Overview

In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. Cable tray manufacturing involves creating trays that are designed to hold, support, and protect electrical cables in various environments. The selection of material and finish is a function of the environment in which it is used, and easily formable (Appendices II and III). Ladder Type Cable Tray. Learn the essential process of making cable trays—those metal channels that organize and protect electrical wiring! This short shows key steps: cutting sheet metal to size, punching or slotting for wire access, bending edges to form the tray shape, welding joints for strength, and smoothing.
