

Eastern European Tube-Type Busbar Company

Overview

Since its foundation in 1979, Eta-com has been an established manufacturer of prefabricated electrical busbar systems with integrated high-quality cast resin insulation, offering sophisticated technical products that meet the latest European standards in terms of quality and. Since its foundation in 1979, Eta-com has been an established manufacturer of prefabricated electrical busbar systems with integrated high-quality cast resin insulation, offering sophisticated technical products that meet the latest European standards in terms of quality and. The use of busbars for power transmission combines flexibility, durability and quick installation in a wide range of applications. The busbars are manufactured individually according to your specifications and requirements. Busbars from SYKATEC can be flexibly and cost-effectively extended or. As one of Europe's largest busbar processors, we offer our customers first-class solutions made of copper, aluminum, and Cuponal. With decades of experience and a deep understanding of conductive materials, we support you in every phase of your project – from choosing the optimal conductive. Power Busbar System is a modular energy transmission and distribution system created by insulating current carrier Aluminium or Copper busbar conductors placed in a closed body. The busbar system is used to transmit energy to a point along the route within the facility, starting from a point such. CONNEX GMBH is an expert in technical preparation (design/engineering) as well as in the manufacturing of all kind of Bus bar Systems and Current Conducting Tube Systems. Eta-com's. Besides to electrical insulation and mechanical resistance, this also ensures an optimal surface protection against aggressive substances and abrasion.
