Fiber Optic Cable Line Protection Solution

Overview

Fiber optic protection tubing components are used to ensure the safety and longevity of fiber optic cables. They safeguard and protect the sensitive fiber optic wires from external factors such as moisture, dust, and abrasion, which can impact the transmission quality of the cables. Protectorshell split pipe is used in several applications withn the fiber optic, offshore wind. The Corning Outdoor Pathway Tape is a pressure-sensitive adhesive tape designed to protect optical fibre cables along paved surfaces. For technical. Fiber optic cables enable high-speed, long-distance data transfer, forming the backbone of modern communication. Yet, outdoors, they face temperature swings, moisture, UV exposure, rodents, and human interference. The product range is consists of Microducts, Flat Duct, Flat Flex Duct, Duct, Indoor Microducts. ESEN has an accredited laboratory to perform all required tests on Microduct to achieve.
