

Fiber optic router LAN indicator

Overview

Solid Green: An Ethernet device (like your router) is connected and transmitting data. Try a different cable or port if needed. On most models — including the Langzhi L801, L880G, and L881G — you'll find the indicator lights on the front panel, usually with small icons or text labels underneath. Here are the lights you're most likely to see:.

Underneath the box, from left to right, are 3 connectors – power, LAN out, optical fibre in, That middle one is the one that goes to your router. POWER Normal: Solid/stagnant light. PON (Passive Optical Network) Normal: Solid. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP). The following table describes the status of the PON and LOS LEDs.
