

Fully Automated Assembly Machine for Optical Cable Terminal Boxes

Overview

Our Fiber Optic Box Automatic Assembly Machine integrates robotics and precision engineering to automate the entire assembly process. Designed for efficiency, it reduces labor costs by 60% and increases production output by 200%. This machine ensures seamless integration into existing production. The system FlexLine stands for automated processing based on robotics and modularization. Schäfer is putting the current customer-specific requirements into practice with this future-oriented solution, for example for cable processing. The system is particularly suitable for a high variety of. According to the study "Panel building 4.0" by the Institute for Control Engineering of Machine Tools and Manufacturing Units of the University of Stuttgart in classic panel building, 72% of the working time in the installation phase is required for wiring and mechanical assembly.
