

How to connect a fiber optic serial terminal box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. Installing a fiber optic termination box is one of those jobs that looks simple on paper, but it's easy to. It is used in a terminal box to connect the optical fibers in the optical cable, and to connect the optical cable and the jumper through the terminal box coupler (adapter). If you do not have relevant experience and skills, it is recommended to ask a professional to install it. Preparations: Before installation. FODB-8 is installed with adapters, splitters, drop cable patchcords, pole bandings, and fiber cable slack storage. FTTH fiber optic distribution box FODB-8 other called gel sealed FTTH termination box designed to terminate feeding optical cable and connect last mile cables as fiber optical patch. A fiber termination box is the standard instrument used in fiber optic networks to connect, secure, and protect optical fibers at the terminating point.
