

How to move multiple 24-core optical cables from one reel

Overview

Imagine managing thousands of single-core jumpers in one row, it quickly turns into a spaghetti nightmare. Enter the MPO (Multi-Fiber Push-On) connector. Compact, high-density, and standardized, MPO brings order to chaos by consolidating many fibers into a single plug. The FCR-1000 series cable reels are designed to fit Princetel's standard FORJs and slip rings. The rotary joints are protected inside the drum for durability and seamless deployment of single or multi-channel fiber optic and/or electrical cable with uninterrupted optical and/or electrical signal. In addition, there is also a General Installation guide (for both copper and fibre) which includes further information. I have them taped together every 2 ft. with electrical tape, on a large Schill reel and couldn't be happier. Un-coiling is a breeze and coiling up takes about 60. 24-core MTP/MPO cabling represents an innovative, high-density wiring solution leveraging 24-core MTP/MPO cables. this video are showing how to.
