Micro-module IDC Data Center

Overview

This system is a micro-module data center, integrating server rack systems, enclosed aisle systems, precision air conditioning, UPS power distribution systems, environmental monitoring systems, security systems, and more. Delta's micro-modular data center was selected by China telecom clients as one of nine major internet data centers (IDCs) in a Chinese province in its plan to rapidly establish energy-saving and environment-friendly IDCs., which can realize dual-row closed/open hot and cold channels for multiple deployments, and the power of a single cabinet can reach up. In the global digitalization process, data, as a core production factor, drives industrial transformation. The scale of China's digital economy increased from 39. 9 trillion yuan in 2023, contributing 66.
