

Optical Module Mounting Equipment

Overview

High-Speed Mounting Equipment for Optical Modules serves as the core apparatus in semiconductor packaging and optical module manufacturing, enabling the high-precision mounting of micro-nano components such as optical chips, lenses, and optical fibers onto substrates or carriers. Thorlabs offers a full range of holders, adapters, and cage plates for lenses, filters, mirrors, pellicles, prisms, and other optical components. These include fixed and adjustable mounts, 45 degree adapters, and nested mounts. The TECHSPEC Optical Cage System provides excellent versatility as well as easy assembly of any number of optical system configurations. Kinematic mounts or translation stages are available to ease. ©2025 Newport Corporation.
