

Optical cable OPGW optical cable parameters

Overview

OPGW is mainly composed of optical units (optical fiber, protective tube) and ground wire units (aluminum-clad steel wire, aluminum alloy wire). They adhere to international 1 and local standards 2 to ensure safety, functionality, and durability, making them essential for modern. ation on high voltage overhead power lines. Temperature range: -40 nce values. The specification describes the basic design of COMCAST® OPGW with its main. An optical fiber composite overhead ground wire (OPGW) is a new type of ground cable used in the high-voltage power transmission system that serves as both a conventional overhead ground cable and a communication optical cable. Installed at the top of high-voltage and extra-high-voltage transmission lines, OPGW cables provide lightning.
