

Outdoor cable trays for trough use

Overview

Our engineer's guide helps you choose the right outdoor cable tray based on environment, load, and corrosion resistance. Select HDG, Aluminum, or FRP with confidence. Grounding: Metallic trays (Steel, Aluminum) can be used as part of the equipment grounding conductor, but this must be designed and labeled per code (e. Fiberglass (FRP). Ladder cable trays are most appropriate when: A perforated cable tray—also called a ventilated trough tray —features a solid bottom with regularly spaced ventilation holes and continuous side rails. Unlike ladder trays, the bottom surface provides continuous cable support, while the perforations. Cable troughs are convenient systems for providing safe, secure and practical management of electrical cables, pipes and other service utilities. They can act as a permanent or temporary routing solution for applications where cables need to be quickly adapted.
