Remote Communication Power Distribution Box

Overview

This intelligent power distribution unit (PDU) remotely manages and controls the power supply of up to 4 devices via TCP/IP and network connection. Ideal for remote control and management of electrical equipment, whether commercial, residential or industrial. This highly customizable unit offers a choice of standard or rack depth cabinets with up to four panel boards, each with 42 circuit breakers. Big power is coupled with extensive monitoring in the. Cyberex, an innovative leader in critical power switching and distribution, provides its customers with the most advanced RPP lineup in the industry. Cyberex RPPs utilize technology leading circuit protection components and a wide array of advanced circuit management options. Our integrated circuits and reference designs help create remote power distribution automation systems for regulating transmission voltage and improving power quality by continuously providing variable leading/lagging power and. Remote distribution box monitoring By leveraging the intelligent remote monitoring function, you can collect the electric meter readings and implement networked transmission and control the safety energy. With its small form factor, this.
