ST Adapter Upgrade Version

Overview

Download the latest ST-LINK/V2-1 firmware upgrade. Plug the Nucleo board to your PC using a standard USB cable and wait until the USB enumeration is completed. SEGGER offers a firmware upgrading the ST-LINK on-board on the Nucleo and Discovery Boards. This firmware makes the ST-LINK on-board compatible with J-Link OB, allowing users to take advantage of most J-Link features like the ultra fast flash download and debugging speed or the free-to-use. To update the firmware of ST-LINK boards, ST offers three aplications: STM32CubeProgrammer (STM32CubeProg) is an all-in-one multi-OS software tool for programming STM32 products. STM32 ST-LINK Utility (STSW-LINK004) is a full-featured software interface for programming STM32 microcontrollers. Prerequisites are: ST-LINK debugger/programmer, Female wires, Adapter, DEBUG-WIRE and SWD-NEEDLE. Additionally, I assume you have a genuine ST-Link V2.
