

TFC Optical Module

Overview

TFC provides customized Optical Engines (OEs) for optical transceivers: specifically, DR8 (or 2xDR4) and 2xFR4 Optical Engines, designed to meet the needs of short-reach or medium-reach transceivers for interconnection scenarios in AI clusters. Partnership provides a solution, combining OSAT (Outsourced Semiconductor Assembly and Test) services with advanced Tx engine designs for optical communication systems, streamlining the production and integration of silicon photonics technology into the market SANTA CLARA, Calif., 31 March 2025 —. CAMBRIDGE, Mass. 6T-DR8 optical transceiver leveraging HyperLight's TFLN Chiplet™ Platform. As the biggest and most influential international event in the global optical communication field, OFC has attracted many industry leaders. TFC Communication is a leading provider of optical sub-assembly integrated solutions and advanced optoelectronic package manufacturing services. The company's shares, hovering at 150.9 CNY on November 16, have surged as investors chase the next wave of 800 Gbit/s.
