

UPS Power Supply Battery System Test Report

Overview

This Test Reporting Template is to be used for recording data/measurements in accordance with the Final Draft Version 1. This template includes four worksheets, two of which are to be completed for the testing of Ac-output UPSs and the other two for. 1 IEC System of Conf non-commercial purposes as long as the IECEE is acknowledged as copyright owner and source of the material. IECEE takes no responsibility for and will not assume liability for damage and appended to a CB Test Certificate issued by an NCB in accordance with this Test Report and. An electrical device known as an uninterruptible power supply, often known as a UPS or uninterruptible power source, delivers emergency power to a load whenever the input power source (or) mains power fails. A UPS varies from an auxiliary, emergency, or standby power system (or) standby generator. Supply by 60VDC battery or 200-240VAC, 50/60Hz AC power source. All tests were conducted on 1500VA, all models are different of model name and input power, output power. Components, Which are certified to IEC and/or national standards, are applied correctly within their ratings. Components not. Follow these step-by-step procedures for key inspection areas on your UPS systems to ensure reliability and compliance. NOTE: You can only use this report with certain types of UPS systems.
