

What is an APC optical cable

Overview

APC connector is the most widely used fiber connector type today. “APC” stands for Angled Physical Connect. Previously, in accordance with the classification criteria of different structures of fiber connector types, we have introduced. When choosing fiber optic cables or fiber connectors, you may find that the description of the product noted the word “PC Polish”, “UPC Polish” or “APC Polish”. Unlike flat fiber connectors, physical contact connectors have a slight taper. What is an SC/APC Fiber Optic Cable?

The SC/APC connector is a type of single-mode fiber connector with a square shape and an angled end, making it easy to align the optical fibers inside. It looks like the PC connector has a flat end, but in fact, it has a small taper around the.
