

Which portable fiber optic router is the best

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Whether you're streaming, gaming, or working from home. This router isn't just fast; it's packed with features that solve typical fiber issues—like mass device connectivity, parental controls with Bark, and easy setup via web tutorials. Keep reading for a rundown of the best fiber optic internet routers in 2026.
